

## Questions

- 1 > Do we have to pay for inter server bandwidth ?
- 2 > Is the list of servers needed in the collaboration environment correct ?
- 3 > I have assumed that CI is needed, is this valid?
- 4 > only the significant interfaces have been drawn, do we need to include others?

### Cost per interface

```
for each interface
  Cost += bandwidth cost
  Cost += latency
end
```

Show stopper > protocol

Show Stopper > Legal

### Cost per interface

```
for each entity
  Cost += processor
  Cost += memory
  Cost += storage
  Cost += license
end
```

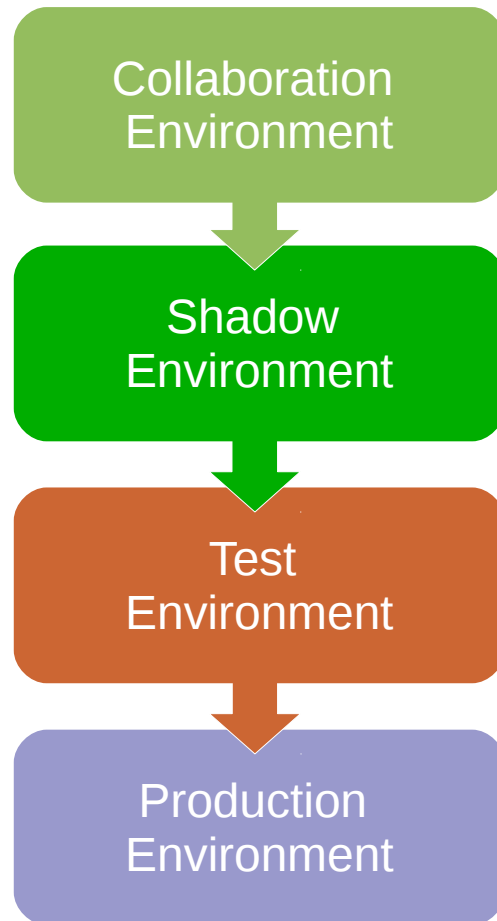

Show stopper > OS

### Benefits we need to cost

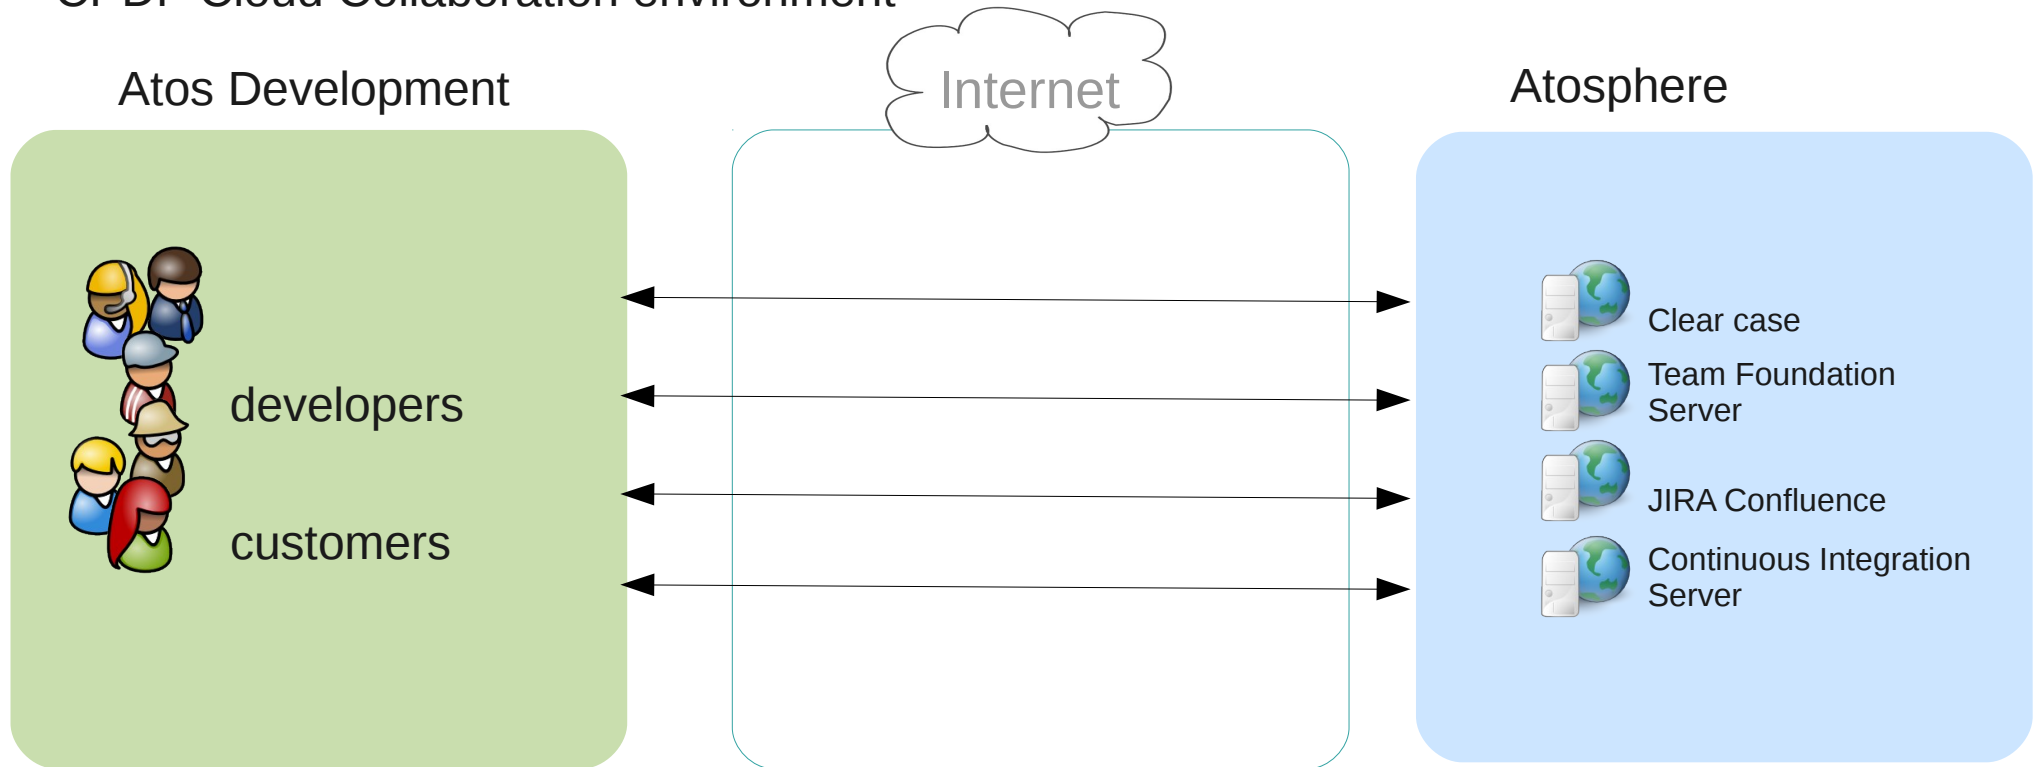

Flex cost reduction

Growth cost reduction
